

CSS Attribute Selectors

Selector	Example	Example description
[attribute]	[target]	Selects all elements with a target attribute
[attribute=value]	[target="_blank"]	Selects all elements with target="_blank"
[attribute~=value]	[title~="flower"]	Selects all elements with a title attribute containing a space-separated word "flower" (elements with title="flower", title="summer flower", and title="flower new", but not title="my-flower" or title="flowers")
[attribute =value]	[lang="en"]	Selects all elements with a lang attribute value starting with "en" (the value has to be a whole word, either alone, like lang="en", or followed by a hyphen(-), like lang="en-text", but not lang="english")
[attribute^=value]	a[href^="https"]	Selects every <a> element whose href attribute value begins with "https" (the value does not have to be a whole word)
[attribute\$=value]	a[href\$=".pdf"]	Selects every <a> element whose href attribute value ends with ".pdf" (the value does not have to be a whole word)
[attribute*=value]	a[href*="te"]	Selects every <a> element whose href attribute value contains the substring "te" (the value does not have to be a whole word)
